

Reusable Autonomous Operations on customer KPIs / OKRs

Large telecom operator · multi-vendor · multi-domain. Propose reusable managed services: reactive → predictive → autonomous.

NORTH STAR

End-user experience and Net Promoter Score · contractual performance-indicator attainment · market trust. Total cost of ownership funds the outcome — it is not the outcome.

GIVEN

Ericsson + third-party under Managed Services

METHOD

Design→Deploy→Operate→Assure→Improve · pilots first

PROOF

Telefónica Argentina · Three UK

STORYLINE · ONE STAGE PER SLIDE

1 Unlock → 2 Autonomy → 3 Measure → 4 Reuse → 5 Enable → 6 P&L → 7 Ask

PDF shows budget only · open PPTX in Slideshow for live countdown bar

Vendor consolidation unlocks autonomy — it is not the goal

STAGE 1 · ECONOMIC UNLOCK

IT OPS BUDGET

\$50m

Multi-vendor run cost

AFTER CONSOLIDATION

\$40m

~20% TCO reduction

GOVERNANCE

–20%

Vendor / SLA overhead

PAIN TODAY

Finger-pointing · noisy KPIs · slow cross-domain correlation

UNLOCKS

Single accountability · observability baseline · lower governance

CHAIN

L1 → L2/L3 → infra/cloud → change → SDM → problem/sunset

Reactive → predictive → autonomous — with gates

STAGE 2 · AUTONOMY PATH

REACTIVE

Ticket storms · multi-vendor blame

OBSERVE

One health view across domains

PREDICT

Anomaly detection before impact

AUTONOMOUS

Self-heal · human-in-loop → policy auto

LIFECYCLE

Design → Deploy → Operate → Assure → Improve — one productized journey; intent & policy replace tribal manual action over time.

Size from incidents. Contract soft-ramp.

STAGE 3 · MEASURE

DISCOVERY → CONTRACT

- 6–12 months incident ingest
- SME + AI → maturity per component
- Top-offender backlog
- CPI catalogue with soft-ramp
- Same scoreboard for roadmap & P&L

ILLUSTRATIVE CPI CREDITS

- Availability credits ~20%
- P0/P1 restore $\leq 4h$ (~10%)
- Change success $\geq 98\%$
- Proactive problems $\geq 20\%$
- Repeat P0–P2 $\leq 10\%$

Productize reuse — next customer inherits the library

STAGE 4 · REUSE LIBRARY

METRICS & RUNBOOKS

Drag-drop packs — not rebuild

SELF-HEAL CLASSES

Versioned known failure classes

ERICSSON + 3PP

Thin adapters under one MS model

TRADE-OFF

Thin adapters > rip-and-replace

IMPROVE → GLOBAL

Library compounds across regions

FUNDING

Account seeds IP; portfolio R&D absorbs platform

Enablement cadence — shortened, gated, shared

STAGE 5 · ENABLE

M0–M3

Train · baseline · shadow start

M3–M6

Forward shadow · soft-ramp · champions

M6–M9

Reverse shadow · HITL · region kit

M12–M15

Auto classes · Nth-logo · reuse

CUSTOMER OPS

Train · shadow→auto · upskill narrative

ERICSSON REGIONS

Library-first · Deal Desk tiers · reuse %

PILOTS

Pass-gates · M9–M12 stabilize · then auto

PDF shows budget only · open PPTX in Slideshow for live countdown bar

Full-time-equivalent ramp · site-mix · tools · penalty lot

STAGE 6 · P&L CONSTRUCT

Baseline B. Target X = B-30%. Customer commit ~20%; size at 30% → ~10-point structural EBIT gap.

PDF shows budget only · open PPTX in Slideshow for live countdown bar

Lived proof. One recommendation.

SLIDE BUDGET

1:15

by end 10:00 · left 0:00

STAGE 7 · PROOF & ASK

TELEFÓNICA ARGENTINA — ~\$100m

Top-offender discipline · KPI transparency · accountability → renewal

THREE UK — ~\$125m

Consolidation · ~75 CPIs · SPOG + self-heal · 474→336 FTE · lowest P1s

RECOMMENDATION

Launch reusable Autonomous Operations managed services (Ericsson + third-party under MS) selling autonomy maturity + observability + outcome KPIs as one journey — with enablement and pilots before scale. Reverse shadow M6–M9 · Auto classes M12–M15.
