

Grow topline. Protect EBIT. Reposition the offering.

Application Managed Services: strong delivery, but commercially stuck — flat net sales, gross margin 28% → 22–24%, Sales cannot sell value, regions discount without trading scope.

THE JOB IN THIS ROLE

Accountable for new revenue (new sales / topline) and profitability (gross margin / EBIT). Discounts sustain revenue only when traded for additional scope, term, or customer investment — never free margin bleed.

Five-lens diagnosis — what we would gather

STAGE 1 · FIVE-LENS DIAGNOSIS

A WIN / LOSS	B MARGIN	C COMPETITIVE	D CUSTOMER VOICE	E PORTFOLIO FIT
Top 10 accounts. Tag price-only vs value unclear. Trigger: value unclear >30% → positioning broken.	GM waterfall. Was discount traded for scope / term / attach? Bleed without trade → fix.	Staff aug vs outcome peers. Buyers ask for tiers → reposition.	High satisfaction + low willingness to pay = story gap.	18-month path to topline + margin? Pull-through? Sunset only if both fail.

Root causes — commercial, not delivery

STAGE 2 · ILLUSTRATIVE FINDINGS

1 WRONG SELLABLE UNIT

Sold as L1/L2/L3 staffing. Procurement benches rate-per-person. Hits topline: flat sales.

2 DISCOUNT WITHOUT TRADE

Regions discount with no floor and no scope trade. Should trade discount for scope/term/investment. Hits margin: 28%→22–24%.

3 VALUE STORY GAP

Buyers want outcomes; Sales pitches headcount. Hits both new revenue and price defence.

STAGE 3 · DECISION FRAMEWORK

SUNSET

Rejects footprint. Only if no 18-month path to sales + margin AND no pull-through. Not indicated.

EVOLVE ONLY

More tooling, same sellable unit. Fixes neither Sales narrative nor discount-without-trade.

REPOSITION ✓

Outcome-tiered Application Ops. Stabilize → Optimize → Transform. New value prop + Deal Desk rules.
